

Tricky Fish Optical Illusion

This Optical Illusion is known as the "Jastrow Illusion" and is attributed to psychologist Joseph Jastrow. First, color the fish. Then cut out the arcs and hold them out horizontally with one above the other. Which one looks longer? The bottom one will always appear to be longer, but you can set one on top of the other to prove that they are the same size!

Make this Pig a Character!

What kind of character will you create? A baby pig, princess pig, hero pig, villain pig, grandma pig, robot pig, or something totally different? Draw on this pig and let your imagination run wild as you create a character!

The "Color Eel"

Color the "Color Eel" the appropriate colors. Then select a color and find it's complement by picking the color that is directly across from it on the Color Eel. Keep this as a handy reference when trying to find colors that go well together when creating your own artwork!
